Bilateral Meetings

- 02.30 pm - 04.00 pm
- 04.30 pm - 06.00 pm

Description

The WISIONS initiative has been actively promoting the introduction of sustainable energy solutions and resource efficiency since it was launched in 2004. The main objective of WISIONS is to make clean energy a default solution for basic energy needs in developing regions, by helping local partners to identify successes and bring them to scale through regional networks, marketing and demonstration.

Offer

Supporting practitioners in the field

Wisions aims to empower local practitioners to identify and scale successful models and techniques in their regional contexts. It also supports the interaction between practitioners with experience in the implementation of decentralised renewable energy solutions.
