Description

I am the energy lead for the Mozambique office of the UK Department for International Development (DFID = UKAID). I have a significant 5 year programme to offer financial and technical support to private companies supplying off-grid energy technologies who are interested in expanding into Mozambique.

Offer & Request

Finance and technical support for off-grid energy companies considering expanding into Mozambique

I have a significant donor programme that is looking to work with the Mozambique government to build the nascent private sector market for off-grid energy solutions. I'm looking to provide finance and technical support to companies looking to expand operations around Africa and who would consider expansion into Mozambique. I'm targeting energy

solutions including domestic (e.g. solar home systems) and productive solutions (large household systems through to micro- and mini-grids).
