Battery / Energy Storage

Rural Electrification

Energy

Offer & Request

Precision Energy Management

Equatorial energies is a SME that offers the services of project development with an additional effect of capacity building, maximising energy efficiency, sustainability, and ensuring all our projects are in line with the sustainable development goals.

We are offering this service to any firm with the agenda to implement utility scale and commercial solar PV plants in East Africa.

We are requesting for partners, who can fund the initiative and who believe in the idea of captive power, powered by solar.
